

AFIC 2019 - Field Tour and MPfN

Start Date: 6/9/2019 7:45 AM

End Date: 6/9/2019 5:00 PM

The Field Tour and More profit from Nitrogen (MPfN) program session is a joint initiative between Fertilizer Australia and Cotton Research and Development Corporation, managers of this leading national research project into nitrogen use efficiency (NUE). MPfN is Australia's most comprehensive investigation into the contributing factors which effect NUE and the application of potential cutting-edge management and technologies to increase NUE across the sectors of cotton, dairy, horticulture (tree crops) and sugar. The MPfN Program Partner Forum 2019 will also be conducted on Thursday 5th, with opportunity for delegates of both events to interact at coffee breaks, lunch and at the conference dinner. For a summary of the project view the video below and also [here](#).

If you have already registered as part of AFIC 2019, you don't need to register here.
