How Biologically Active is Your Soil?

No Biological Inputs

Four Years of BioAg Inputs

Ten Years of BioAg Inputs

This series of ‘speedo’ graphs show the improvements in soil parameters associated with long term BioAg product use. They are from the one farm and show results from a recently acquired block to a transition block to a fully functional block. The farm is organically certified. For more information about these indicators visit: www.microbelabs.com.au
